Narrative

Job Narrative 480-149032-1

Receipt

The sample was received on 2/13/2019 4:00 PM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.9° C.

GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC/MS Semi VOA

Method(s) 625.1: The following sample was diluted to bring the concentration of target analytes within the calibration range: TC-WEIR01-190213-01 (480-149032-1). Elevated reporting limits (RLs) are provided.

Method(s) 625.1: The laboratory control sample duplicate (LCSD) for preparation batch 480-459432 and analytical batch 480-459568 recovered outside control limits for the following analyte: Di-n-butyl phthalate. This analyte was biased high in the LCS and was not detected in the associated sample; therefore, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

Method(s) 353.2: The continuing calibration verification (CCV) associated with batch 480-459216 recovered above the upper control limit for Nitrite as N. The sample associated with this CCV was non-detect for the affected analyte; therefore, the data have been reported.

Method(s) 1664A, 1664B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 480-459497 and analytical batch 480-459537 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method(s) 9040C, SM 4500 H+ B: This analysis is normally performed in the field and has a method-defined holding time of 15 minutes. The following sample has been qualified with the "HF" flag to indicate analysis was performed in the laboratory outside the 15 minute timeframe: TC-WEIR01-190213-01 (480-149032-1).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

Method(s) 625: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate/sample duplicate (MS/MSD/DUP) associated with preparation batch 480-459432.

Method(s) 625: Due to the matrix, the initial volume(s) used for the following sample deviated from the standard procedure: TC-WEIR01-190213-01 (480-149032-1). The reporting limits (RLs) have been adjusted proportionately.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
